

An underwater photograph showing a sea lion swimming on the left and a diver on the right. The water is clear and blue, with some bubbles visible. The sea lion is dark brown and appears to be resting or moving slowly. The diver is wearing a dark wetsuit and fins, and is positioned vertically, possibly observing the sea lion. The background shows some rocky structures and more water.

Itinerary A "8D"

You will arrive at San Cristobal Island in the morning.

After passing through immigration and baggage claim, you will be met by a Grand Majestic staff member and transferred to the yacht. You will be shown to your cabin where you will have some time to settle in before lunch and a welcome briefing.

El Junco Lagoon

Located in the highlands 19 kilometers from Puerto Baquerizo Moreno, El Junco is located in the caldera of an extinct volcano.

Rainwater feeds the lagoon. There are many farms and ranches in this area of San Cristobal Island, and sometime cows can be found near the lagoon.

DAY 1
ITINERARY

Post Office Bay

You will land on a beach and head to a spot where 18th century whalers placed a wooden barrel used as an unofficial mail box. The custom continues to this day with Galapagos visitors. So, don't forget your postcards, and don't be surprised if the post card arrives to its destination before you even get home!

Cormorant Point

This site hosts a large flamingo lagoon where other birds such as common stilts and white-cheeked pintails can also be seen. The beaches on this island are distinct: The "Green Beach" named so due to its green color, which comes from a high percentage of olivine crystals in the sand, and the "Four Sand Beach" composed of white coral.

Devil's Crown

You will have a chance to snorkel around Devil's Crown which is the rocky remains of an offshore volcano sticking out of the water. This is a great location to spot a wide range of marine creatures.

DAY 2
ITINERARY

DAY 3 ITINERARY

Suarez Point

On the trail to Suarez Point you will have the chance to spot blue-footed boobies, albatrosses, and Nazca boobies. This island is the breeding site of nearly all of the world's 12,000 pairs of waved albatrosses. You will also visit a beautiful site on the ocean front where there is a cliff that the large albatrosses use as a launching pad! You will have the chance to see the famous blowhole that spurts sea water into the air. The landscape is great for photography.

Gardner Bay, Gardner Islet & Osborn Islet

This excursion takes you to the spectacular Gardner Bay. After landing, you can walk across a lovely white-sand beach amongst a busy sea lion colony or dive into the water to swim with sea lion pups. You may also see curious mockingbirds on the beach.

DAY 4 ITINERARY

Los Gemelos (Twin Craters)

You will visit the Twin Craters located opposite to each other on both sides of the road leading from Puerto Ayora to Baltra. The name is only figurative; not real craters, these formations were created by the collapse of surface material in underground fissures and chambers. The view is breathtaking

Charles Darwin Station / Fausto Llerena Breeding Center

The Charles Darwin Research Station is home to turtles ranging from 3-inches (new hatchlings) to 4-feet long. Subspecies of turtles interact with one another and many of the older turtles are accustomed to humans stretching out their heads for a photo opportunity. The babies are kept until they are about four years old and strong enough to survive on their own.

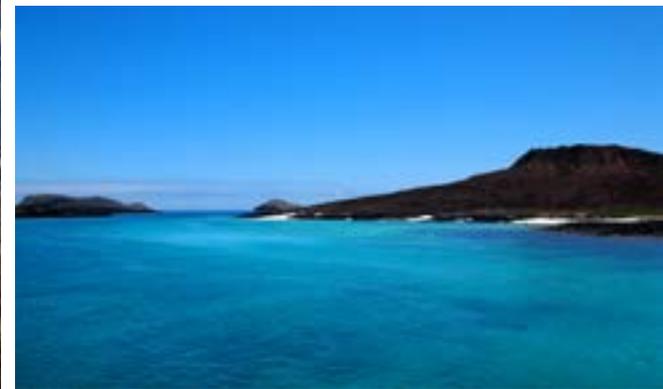

El Barranco

Also known as Prince Phillip's Steps, El Barranco's steep, rocky paths leads up to a high cliff-face. A marvelous view can be appreciated from here. This site is also home to palo santo vegetation as well as red-footed boobies, short-eared lava owls, Galapagos swallows, and Galapagos doves.

Darwin Bay

This white sand coral beach heads a half mile trail (0.75km) that winds through mangroves filled with land birds. Nazca boobies, red-footed boobies, and swallow-tailed gulls can be spotted here. Further down the path are tidal pools where sea lions swim playfully. At the end is a spectacular view off a cliff.

DAY 5
ITINERARY

DAY 6 ITINERARY

Rabida Island

Rabida Island (Jervis) is one of the most colorful and volcanically varied islands in the archipelago and a great snorkeling site. Its famous maroon sandy beach and stunning lookouts provide wonderful landscapes. The island is a birdwatcher's delight. Some of the rarest species are in abundance, such as nine varieties of finches, large-billed flycatchers, Galapagos hawks and brown pelicans

Chinese Hat Islet

This small islet is located near the southeast coast of Santiago Island. Its name comes from the distinct shape of the islet's summit. This small islet is a great location to view many geological formations such as lava tunnels and lava flows. Some of the lava flows were formed underwater and subsequently raised above sea level. The presence of coral heads on the lava flow indicates this phenomenon.

DAY 7 ITINERARY

Witch Hill

Located on the northern coast, this eroded hill and its surroundings present one of the most picturesque beaches in the Galapagos with its white powdery sand and the abundance of animals. Wildlife includes sea turtles, rays, and various types of booby birds. The clear water provides an excellent opportunity for enjoying swimming and snorkeling.

Lobos Island

The name of this island means "Sea Lion Island." This appropriately named island is ripe with noisy, frolicking, jolly sea lions who will welcome you to their home with open, well, fins. This island also offers great snorkeling opportunities as well as the chance to see blue-footed and Nazca boobies.

DAY 8 ITINERARY

Gianni Arismendy Interpretation Center

The Interpretation Center was opened in 1998 as a phase of the project "Interpretation and Environment Education Project." Visitors enjoy expositions on natural history, human history, and conservation. The conservation efforts represent the movement to protect the wildlife and natural environment through means of population and tourist control. The Interpretation Center has an outdoor stadium, audio-visual equipment, and meeting rooms

San Cristobal airport departure

After this final visit, you will be transferred to the San Cristobal airport in time for your flight back to the mainland.
